## **DETAILED ACTION**

### ***Application Status***

1. Claims 1-18 are pending in the instant application.

### ***Restriction of Species***

2. This application contains claims directed to the following patentably distinct species of the claimed invention:

- a) Methods of obtaining variants using crystal structures, and
- b) Methods of obtaining variants not using crystal structures.

Applicant is required under 35 U.S.C. § 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, Claims 1-13 generic (it is noted that Claim 5 contains, within its options, the crystal structure species). These two species are distinct because they use distinct method steps. The use of crystal structure analysis to select mutation sites is distinct from methods using, for example, alanine scanning of all cysteine residues, because the method step of selection is wholly distinct wherein one selects on the basis of a specific structure and the other selects on the basis of sequence. Thus, these species are patentably distinct.

If Applicants elect the species of using crystal structures in the methods, Claims 14-18 will be examined in the next Office action. If no prior art is found, then all Claims will be examined in the next Office action. If Applicants elect the species of not using crystal structures in the methods, Claims 1-13 (to the exclusion of using crystal structures in the methods) will be

Art Unit: 1652

examined in the next Office action. If no prior art is found, then all Claims will be examined in the next Office action.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 C.F.R. § 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. M.P.E.P. § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. § 103(a) of the other invention.

### ***Election of Species***

3. Applicant is advised that the reply to this requirement to be complete must include an election of the species to be examined even though the requirement be traversed (37 C.F.R. § 1.143).

Art Unit: 1652

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 C.F.R. § 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 C.F.R. § 1.48(b) and by the fee required under 37 C.F.R. § 1.17(i).
